-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 29 January 2001.
2a) This action is **FINAL**. 2b) This action is non-final.
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-5 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) Claim(s) _____ is/are allowed.
6) Claim(s) 1-5 is/are rejected.
7) Claim(s) _____ is/are objected to.
8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on 29 January 2001 is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
5) Notice of Informal Patent Application (PTO-152)
6) Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent No. 6,192,109 to Amrany et al.

Referring to claim 1, Amrany et al disclose in Figure 2 a method for providing xDSL/POTS line sharing (Local loop 24) for multiple subscribers (Elements 26-29). The method comprising the steps of:

(a) Accessing a telephone line (local loop 24) supporting POTS services (from Telco Network in Central office 20) destined to a first subscriber (POTS equipment 26, 27 or 29). Local loop 24 provides POTS information from central office 20 to POTS telephones 26,29 or PSTN modem 27. Refer to Column 5, lines 4-21.

(b) Multiplexing xDSL services (from Internet in Central office 20) with said POTS services (from Telco Network in Central office 20) over said telephone line (Local loop 24) for delivery to a second subscriber (xDSL equipment 28). Access module 42 multiplexes xDSL signals from the Internet and POTS signals from the Telco Network.

Local loop 24 provides xDSL information from central office 20 to xDSL modem 28. Refer to Column 5, lines 5-22.

Referring to claim 2, Armany et al disclose in Figure 2 that the method further comprises the step of:

(c) Splitting the xDSL services from the POTS services at a remote location (Customer premise 22). POTS splitter 30 at the customer premise 22 separates the low frequency POTS signals from the high frequency xDSL signals. Refer to Column 5, lines 22-29.

(d) Forwarding the POTS services to the first subscriber (POTS equipment 26, 27 or 29). POTS splitter 30 sends the POTS information to POTS equipment 26, 27 or 29 through the POTS filter. Refer to Column 5, lines 22-29.

Referring to claim 3, Armany et al disclose in Figure 2 that the method further comprises the step of:

(c) Splitting the xDSL services from the POTS services at a remote location (Customer premise 22). POTS splitter 30 at the customer premise 22 separates the low frequency POTS signals from the high frequency xDSL signals. Refer to Column 5, lines 22-29.

(d) Forwarding the xDSL services to a second subscriber (xDSL equipment 28). POTS splitter 30 sends the xDSL information to xDSL equipment 28 through the high-pass filter. Refer to Column 5, lines 22-29.

Referring to claim 4, Armany et al disclose in Figure 2 a system providing POTS/xDSL line sharing for multiple subscribers (Elements 26-29) over a single telephone line (Local loop 24). The system comprises:

- (a) A xDSL interface (Internet connected to Access Module 42) located at or near a central office (Element 20) for sending to and receiving xDSL signals from a first subscriber (xDSL equipment 28). Access module 42 accepts xDSL signals from the Internet. Local loop 24 transmits xDSL signals from central office 20 to xDSL modem 28. Refer to Column 5, lines 5-22.
- (b) A POTS interface (Telco Network connected to Access Module 42) located at or near the central office (Element 20) for sending to and receiving POTS signals from a second subscriber (POTS equipment 26, 27 and 29). Access module 42 accepts POTS signals from the Telco Network. Local loop 24 transmits POTS signals from central office 20 to POTS telephones 26,29 or PSTN modem 27. Refer to Column 5, lines 5-22.
- (c) A splitter/coupler (Access Module 42) for multiplexing both xDSL and POTS signal over a single telephone line (Local loop 24) and for splitting (Element 30) xDSL and POTS signals received over said telephone line (Local loop 24). Access module 42 multiplexes xDSL signals from the Internet and POTS signals from the Telco Network for transmission across local loop 24. Refer to Column 5, lines 11-14. POTS splitter 30 at the customer premise 22 separates the low frequency POTS signals from the high frequency xDSL signals. Refer to Column 5, lines 22-29.

Referring to claim 5, Amrany et al disclose in Figure 2 that the system further comprises: (d) A splitter (Element 30) located in remote location (Customer premise 22) for separating POTS signals from xDSL signals and for forwarding said POTS signals to the second subscriber (POTS equipment 26, 27 or 29). POTS splitter 30 at the customer premise 22 separates the low frequency POTS signals from the high frequency xDSL signals. POTS splitter 30 then sends the POTS information to POTS equipment 26, 27 or 29 through the POTS filter. Refer to Column 5, lines 22-29.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine Ng whose telephone number is (703) 305-8395. The examiner can normally be reached on M-F; 8:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nguyen Chau can be reached on (703) 308-5340. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
